The Course :

200 miles of jeep roads, power line and forest trails, subdivision roads, and cross country. As the name implies, there will be a lot of rock in various forms. About twenty miles of the course is on short sections of state and county roads. These sections are paved and under general use by the public. For this reason, a rider assumes full responsibility for entering with anything other than a street legal bike and motorcycle drivers license. These sections are short and remote and we do not anticipate any problems, however, the risk is there and you should be aware of it. The first forty miles on the first day will be a time keeping section where you will be penalized for coming in early, not for being late. This is to keep the speeds down in this area. Check points will be hidden in this section, and there will be one speed average for the entire section. Learn to keep time and install an odometer to keep your score down. There will be an impound area, and your bikes will be impounded Sat. nite; special regulations for working on your bike to put the whole load on the rider, so carry everything you will need. Gas will not be over 35 miles apart. Wear three number plates. Your number will be given to you with the mail out; it is your starting time; you will be racing the clock, and trying to keep your penalty points as low as possible.
